(S//SI//REL TO USA, FVEY) SHELLTRUMPET Processes it’s One Trillionth Metadata Record

By NAME REDACTED on 2012-12-31 0738

(S//SI//REL TO USA, FVEY) On December 21, 2012 SHELLTRUMPET processed its One Trillionth metadata record. SHELLTRUMPET began as a near-real-time metadata analyzer on Dec 8, 2007 for a CLASSIC collection system. In its five year history, numerous other systems from across the Agency have come to use SHELLTRUMPET’s processing capabilities for performance monitoring, direct E-Mail tip alerting, TRAFFICTHIEF tipping, and Real-Time Regional Gateway (RTRG) filtering and ingest. Though it took five years to get to the one trillion mark, almost half of this volume was processed in this calendar year, and half of that volume was from SSO’s DANCINGOASIS. SHELLTRUMPET is currently processing Two Billion call events/day from select SSO (Ram-M, OAKSTAR, MYSTIC and NCSC enabled systems), MUSKETEER, and Second Party systems. We will be expanding its reach into other SSO systems over the course of 2013. The Trillion records processed have resulted in over 35 Million tips to TRAFFICTHIEF.
